

ANNUAL REPORT 2018-19 (Faculty Development Programs)

AVANTHI INSTITUTE OF ENGINEERING & TECHNOLOGY

TAMARAM, MAKAVARAPALEM, VISAKHAPATNAM-531113

PREFACE

Each member of the faculty must become a learner before he/she becomes a teacher. It is a two-way process. To maximize the ability of faculty to teach and students to learn and to nurture a productive culture, faculty development should lie at the heart of any higher education institution. To enhance and empower the faculty in their own domain of knowledge, we, the institution, organize faculty development and training programs for both teaching and non-teaching faculty yearly.

FACULTY DEVELOPMENT PROGRAM- 1

TOPIC : A five day Faculty Development Program on “Block Chain Technology and its Applications”
Date/s : 13-05-2019 to 17-05-2019
Venue : Seminar hall, Avanathi Institute of Engineering and Technology, Makavarapalem.
Resource Person : Dr. Y. Anuradha

Introduction:

Block chain technology is an advanced database mechanism that allows transparent information sharing within a business network. A block chain database stores data in blocks that are linked together in a chain. The data is chronologically consistent because you cannot delete or modify the chain without consensus from the network. As a result, you can use block chain technology to create an unalterable or immutable ledger for tracking orders, payments, accounts, and other transactions. The system has built-in mechanisms that prevent unauthorized transaction entries and create consistency in the shared view of these transactions.

OBJECTIVES:

The objectives of the Faculty Development Program are

- Understanding the fundamentals of block chain technology.
- Understanding the types of block chains.
- Understanding the concept of hyper ledger.
- Understanding the security analysis of block chain.
- Applications of block chain technology, IOT.
