SMART MEDICINE REMINDER AND DISPENSER

ABSTRACT

Medicines are playing an important role in lives of many people who were suffering with long time health problems like BP, diabetes, breathing problems, heart problems, cancer and those people need to take medicines regularly. This may lead to severe problems. So, they should take medicines regularly due to forgetfulness increasing day by day in them and busy schedule of some people. So, this project solves this by reminding the medicine time through buzzer and dispensing the correct medicine which is to be taken through dispenser.
