E –POLICLING

E-government, necessity for good and corruption free nation, means by using information and communication technologies, especially internet, to achieve better government by delivering public services and processing internal works in government in a much more suitable, customer leaning and cost effective. Like other e-government related services e-police system is also an e-government related service which makes the communication process a possibility, a great success for modern era with increasing the professional efficiency for the government's police administrations. Although E-police system is not a new and original idea in context to global scenario especially in developed countries but it is new for developing countries. Our work will definitely help the police system in making the police work more efficient through equipping the police with modern ICT solutions i.e. it aims to ensure solutions and means for the police officers that support their main activity and it will be interesting for audience in the context of law and order situation in developing countries. In our paper we present all about of an e-police system as well as its steps, challenges during implementation, its necessity etc for developing countries and the ultimate goal of this paper is to upgrade the developing countries' police administration to world standard
