AVANTHI INSTITUTE OF ENGINEERING & TECHNOLOGY

AIET started in the year 1999 and offers various courses at Engineering and PG level. The college is providing with rooms, computer centre, laboratories and seminar hall with audio-visual equipments. Industry Institute interaction is conducted regularly to emphasize on the latest trends in the present market.

It is very near to Narsipatnam. Frequent bus facilities are available both from and to Visakhapatnam and Narsipatnam. Very safe and secure hostel facility is available for Girl students. These are the additional facilities besides excellent academic atmosphere in the college campus.

DEPARTMENT OF MANAGEMENT STUDIES

The MBA Department was established in the year 2004 with an intake of 60 students and this was increased to 120 students in the 2012. The department has an eminent faculty and well supported infrastructure and laboratories. The faculty keeps abreast with the latest advances in technology and ensures that hardware equipment and related software are upgraded to ensure its students are able to keep pace with current trends in technology and the industry. The department also offers a Post – Graduate courses. The students are encouraged to participate in workshops, industrial internship, industrial visits and seminars; along with the projects assigned during the course, these activities enable them to broaden their outlook and build in professionalism that makes their transition from college to industry smoother after graduation. Recent advances of sensor technologies have been powered by high-speed and

low-cost electronic circuits, novel signal processing methods, and advanced manufacturing technologies. The synergetic interaction of new developments in these fields provides promising technical solutions increasing the quality, reliability, and economic efficiency of technical products

ABOUT THE COURSE

Nearly every aspect of business is affected by data analytics. For businesses to capitalize on data analytics, they need leaders who understand the business analytic workflow. This course addresses the human skills gap by providing. A data structure is a particular way of organizing data in a computer so that it can be used effectively. The idea is to reduce the space and time complexities of different tasks. Data structures in R programming are tools for holding multiple values. When undertaking any statistical analysis, the type of statistics calculated or statistical test undertaken depends to a large extent on the type of variable being analysed. In this section you will learn about continuous, categorical and nominal variables. How can a text corpus stored in a customer relationship management (CRM) database be used for data mining and segmentation? In order to answer this question we inherited the state of the art methods commonly used in natural language processing (NLP) literature, such as word embeddings, and deep learning literature, such as recurrent neural networks (RNN)

BRIEF REPORT

Department of Management Studies, Avanthi Institute of Engineering and Technology had organized a certificate course on “Business Analytics -Introductory course programming-R For beginners” during 14-12-2020 to 19-12-2020.

We had Prof P. Venkateswarlu, Department of Commerce & Management, Andhra University, the speakers explained the Introduction to Business analytics-introductory course using programming-R: Taking in and processing historical business data. Analyzing the data to identify trends patterns, and root causes. Making data-driven business decisions based on those insights. The Participants have benefitted from the course.

We had Prof U.V Adinarayana Rao, GITAM Institute of Management, GITAM Deemed to be University. The speakers explained the Descriptive Statistics using programming-R: Taking in and processing historical business data. Analyzing the Clustering, text Classification, and root causes. Making data-driven business decisions based on those insights. The Participants have benefitted from the course.
