AVANTHI INSTITUTE OF ENGINEERING & TECHNOLOGY

AIET started in the year 1999 and offers various courses at Engineering and PG level. The college is providing with rooms, computer centre, laboratories and seminar hall with audio-visual equipments. Industry Institute interaction is conducted regularly to emphasize on the latest trends in the present market.

It is very near to Narsipatnam. Frequent bus facilities are available both from and to Visakhapatnam and Narsipatnam. Very safe and secure hostel facility is available for Girl students. These are the additional facilities besides excellent academic atmosphere in the college campus.

DEPARTMENT OF COMPUTER SCIENCE ENGINEERING

The Computer Science & Engineering department was established with B.Tech Program in 1999 with intake of 60 students and this was increased to 120 students in 2007 and increased to 180 students in 2012. The Post graduate Program M.Tech with C.S.E was started in 2005 with intake of 18 Students and this was increased to 24 students in 2012. The Computer Science & Engineering department was accredited by NBA in 2009 and 2014. Department mission is to be Instrumental in the field of computer science & engineering by providing high quality

education and continues improvement process of the program. The department has full fledged faculty with four professors with Ph.D and 40 staff members with experience in teaching and industry, which leads the skill students to get employment in the market. The department encourages the faculty members and the students to participate paper presentations, seminars, workshops and National, International conferences and research activities. The department is well equipped laboratories and the computers have sophisticated development software tools. The department provides training to its students in advanced technologies like JAVA, WEB TECHNOLOGIES, .NET, PHP, Data Warehousing, Data Mining tools and Data storage systems as a supplement to the curriculum to enhance the employability of students. Our faculty members are the members of Computer Society of India, ISTE, IEEE.

ABOUT COURSE

Jenkins is an open source automation server written in Java. Jenkins helps to automate the nonhuman part of the software development process, with continuous integration and facilitating technical aspects of continuous delivery. It is a server-based system that runs in servlet containers such as Apache Tomcat. The participants will be able to learn comprehensively about

Jenkins that provides many plugins to support building, deploying and automating any project.

At the end of this course, one would be able to exhibit a good understanding on Jenkins as an extensible automation server and also that it can be used as a simple CI server or turned into the continuous delivery hub for any project. This course will teach you how to use Jenkins using the Jenkins DSL and Jenkins Pipelines (Jenkins file). It's a new way of using Jenkins, rather than using freestyle projects

TOPICS TO BE COVERED

Day 1	Basics of CI/CD Pipeline
Day 2	Setting up Jenkins
Day 3	Jenkins Pipelines
Day 4	Continuous Integration(CI) with Jenkins
Day 5	Integrating Plugins with Jenkins
Day 6	Securing Jenkins

For Registration please contact Mr.K.Varaprasad, Assistant Professor, CSE.

BRIEF REPORT

Department of Computer Science and Engineering, Avanathi Institute of Engineering and Technology had organized a certificate course on “CICD Pipeline with Jenkins” during 18-6-2018 to 23-6-2018

We had Resource Person : **Dr. Dr.K.Narasimharaju, Associate Professor, CSE Dept, Lendi Institute of Engineering and Technology, Tallavalasa** was the speaker to explain about each and every details of CI/CD Pipeline .He started with off what is it and gave the proper definition.Continuous integration (CI) enables software development teams and workflows. The greatest challenge for many development teams is feature development.Continuous delivery (CD) enables operations teams and workflows. The goal is to safely and repeatedly deliver an artefact into a production environment.

Dr.K.Vijay Kumar,Professor,Vignan’s Institute of Engineering for Women, Duvvada explained about Jenkins provides us with various interfaces and tools in order to automate the entire process.We will create a git repository or use an existing one, Dev team have the responsibility to commit the code to Dev-Branch, Jenkins will fetch the code from Github and will map with the job enabled for a specific task,We will make sure that CI and CD is done for the job/task
