ABSTRACT

The goal of the sustainable shopping guide and product comparison app is to empower consumers to make informed and environmentally conscious purchasing decisions. It aims to provide users with accessible and comprehensive information about sustainable products across various categories. By offering transparency and insight into the environmental impact of products, the app seeks to educate users and raise awareness about sustainable consumption. Ultimately, The goal is to promote sustainable and responsible consumer behaviour towards preservation of planet for the future generations. Through comparison features, it enables users to evaluate the sustainability credentials of different products and make choices aligned with their values. The app encourages businesses to prioritize sustainability and ethical practices in their product offerings. Our sustainable shopping guide and products project offers a comprehensive set of features to empower users to make eco-conscious choices. Firstly, we provide product ratings and reviews, guiding users towards environmentally friendly options. Secondly, it provides comprehensive product information, including ratings. The sustainable shopping guide and products project is a comprehensive initiative aimed at promoting eco-conscious consumerism and fostering sustainable living practices. At its core, the project serves as a resource hub, offering information, guidance, and tools to empower individuals to make environmentally responsible purchasing decisions.
